Step 1:

Go to [Settings] > [Wi-Fi] > [Settings Details]

Step 2:

Turn OFF [Disable when connection failure]

Step 3:

Connect to Camera wireless LAN.

PC (Windows)

The PC satisfies the specifications below which can be operatable.

OS	Microsoft Windows 10 / 8 ※Windows 7 can be operatable. Frame rate may drop when played.
CPU	Core i5 or faster
Memory	8GB or more
Display Resolution	1280×720 or more
Other	DirectX 10.1 or later

※The recommended system is not a guarantees of operation.

Note: Please check the operation by installing software and playing sample videos before purchasing from [Computer Software Download] on this site. Specially, Windows 10/8 updated old model PC cannot work because the PC doesn't satisfy hardware conditions.

※When using PC, frame rate may drop when playing videos because of CPU performance, RAM performance, or other software operations at the same time.
