PC App Recommended environment

DC2000RA **d'Action**

<div style="border: 2px solid red; color: red;">

Recommended environment
*Image processing of video recorded on the three cameras requires high-performance computer system.
 As d'Action 360 software may not run fully on insufficient computer systems, ensure to check the table below
 before purchasing your DC2000RA.

</div>

Recommended system environment (Windows)

We recommend using the d'Action software under the following environment.

Operating system	Microsoft Windows 11
CPU	Core™ i5-8250U or faster
RAM	8GB or more
Display resolution	1280×720 or more
Graphics API	DirectX 12 or later

Mac App is not available.

*These minimum system requirements and recommended environment do not guarantee software operation.
 Before purchasing your DC2000RA, download d'Action software from the URL below.
 https://carmate-usa.com/pages/daction-download-center
 After installing the software on your computer, check the operation using the sample movie below.
 https://daction.carmate.jp/support/app/sample_dc2000r.zip
 Particular attention should be given if you are using an old computer;
 d'Action software may not run properly when other hardware requirements are not met, even after your computer has been upgraded
 to Windows 11.
*Operation on tablet PCs is unconfirmed.
*The video file recorded on this product is a common file type of MOV. Videos can be played back on a default media player on PC or Mac
*Under certain circumstances such as running other applications simultaneously as well as insufficient CPU and/or RAM, videos may
 drop (or miss) frames at playback.
